

The plot displays the difference in the number of nodes between IFACE and various other methods. The x-axis represents a range from 0 to 700, and the y-axis represents the difference in the number of nodes. The legend identifies the following series:

- IFACE: 400gp1 (blue line)
- IFACE: br-363df (orange line)
- IFACE: docker0 (green line)
- IFACE: eno1 (red line)
- IFACE: eno2 (purple line)
- IFACE: enx0234 (brown line)
- IFACE: lo (pink line)
- IFACE: vethe38 (gray line)

The plot shows several sharp peaks and troughs, indicating significant differences at specific points. The most prominent peaks occur around x=180, x=310, x=370, x=450, and x=600. The most significant troughs occur around x=40, x=220, x=360, and x=600.
