

The figure displays the convergence of 15 metrics over 2700 iterations. The metrics are represented by colored lines, with a legend on the right side of the plot. The x-axis is labeled 'Iteration' and ranges from 0 to 2700. The y-axis ranges from 0.0 to 1.0. Most metrics remain near 1.0, indicating convergence. However, several metrics show sharp drops, suggesting a change in state or a failure to converge for those specific metrics at certain points. The legend identifies the metrics by color: blue, orange, green, red, purple, brown, pink, grey, olive, cyan, dark blue, dark orange, dark green, dark red, and dark brown.
