

The graph displays a function that is mostly zero but has several sharp, narrow peaks. The most significant peak is located at approximately $x = 40$, reaching a value of about 1.2. Other notable peaks occur at $x \approx 70$, $x \approx 100$, and $x \approx 120$, all reaching values between 0.8 and 1.0. The function oscillates rapidly between these peaks, with many smaller peaks and troughs that are less pronounced. The x-axis is labeled from 0 to 200 in increments of 50, and the y-axis is labeled from -1 to 1 in increments of 0.5.
